## EDUCATION

---

|                                                                    |                   |
|--------------------------------------------------------------------|-------------------|
| <b>Dr. Sri Sri Sri Shivakumar Mahaswamy College of Engineering</b> | 2022-2026         |
| Bachelor of Engineering, Computer Science                          | Current CGPA-9.08 |
| <b>Varin Pu College, Tumkur</b>                                    | 2020-2022         |
| State, PCMB – 75.66                                                |                   |

## TECHNICAL SKILLS

---

- Languages: python, C++
- SQL (SQL Server, MySQL)
- Python (Pandas, NumPy, Matplotlib, Seaborn)
- Excel (VLOOKUP, XLOOKUP, Conditional Formatting, pivot Tables)
- Microsoft power BI
- CS Fundamentals: Data Structures and Algorithm, OOPS, Operating System, Computer Network

## ACADEMIC PROJECT

---

### Covid-19 Global Tracker | (<https://github.com/Sindhumr13/Covid-19-portfolio>)

- Developed an interactive Power BI dashboard to visualize global COVID-19 trends from 2019 to 2023, highlighting key metrics such as total cases, recoveries, and deaths across countries and year
- Aggregated and visualized key metrics including total cases, recoveries, and deaths across multiple countries and time periods

### Meta Ad Performance Analysis | (<https://github.com/Sindhumr13/Meta-AI-portfolio>)

- **Visual breakdown of impressions, clicks, engagements, shares, comments, and purchases**
- KPI cards for *CTR*, *Engagement Rate*, *Conversion Rate*, and *Purchase Rate*
- Filters for demographic segmentation and campaign-level insights

### House Price Prediction| ([https://github.com/Sindhumr13/House\\_price\\_prediction](https://github.com/Sindhumr13/House_price_prediction))

- House Price Prediction is Implemented of regression model to forecasting housing prices based on location, size. Improved accuracy through feature engineering and handling missing value
- Developed an end-to-end ML model to predict house prices using regression techniques.

### Virtual trial room for online shopping

- Engineered a 2D virtual trial room system enabling users to try on clothes using personal photos, improving online shopping confidence and reducing return rates.
- Designed a lightweight, user-friendly interface that supports real-time garment preview and customization across devices.

## CERTIFICATE

---

- Python - Swayam, Udemy
- HTML and CSS - Springboard Infosys
- National Level Hackathon
